Summary

- 5 years of experience as a software engineer in the telecommunications sector
- Pragmatic and goal-driven
- Code reviewer, team mentor and best-practices advocate
- Currently training Celfocus Trainees @ Core Foundations (Git, Clean code, SOLID and Design Patterns)

Experience

Senior Software Engineer – Jawwy from stc Microservices
JAN. 2020 –NOW

Online, Celfocus (Novabase)
- Part of an agile team responsible for the design and development of Jawwy's Architecture Evolution Microservices
- Microservices designed using a CQRS + Hexagonal architecture and with an API-first approach
- CI/CD using Jenkins and newman
- **Stack**: Java 11, Spring Boot, MongoDB, Postgres, Kafka, Axon Framework

Lead Software Engineer – Product Catalogue
MAR. 2019 – JAN. 2020

Online, Celfocus (Novabase)
- Leader of a small team responsible for the design, development, and maintenance stages of the project
- In charge of aligning requirements and delivering solutions for Product Catalogue consumers
- Migrated from Weblogic + PLSLQ to Wildfly + Postgres
- **Stack**: Java 8, Drools, Spring Framework, Hibernate, Postgres, PLSQL

Software Engineer – Equinox UFE Bill Pay
NOV. 2015 – MAR. 2018

Online, Celfocus (Novabase)
- Collaborated in the design, development, and maintenance stages of the project
- Cooperated with external payment system and field service appointments providers to design and develop system integrations (SOAP, web socket and REST)
- Reduced development time and external systems reliance by developing a service proxy that caches SOAP requests\responses based on rules
- Actively engaged in code reviews, overall system design\architecture and best practices advocate
- Became a reference among peers and was given the opportunity to mentor newcomers
- **Stack**: Java 8 (using Celfocus' framework based on Spring and Hibernate), vagrant, flyway, SoapUI, Oracle PL\SQL and Ext.js 5.1

Education

Licentiate degree, Informatics Engineering, 17

SEP. 2012 – OCT. 2015

Instituto Superior de Engenharia do Porto, Porto

- Received a Merit Scholarship – DGES (Academic Year 2012/2013)
- Designed and developed an online store with CakePHP and a management platform using ASP.NET MVC (graded 18 out of 20)
- Designed and developed a simulation of the Paris metro line, including shortest paths between metro stations, using Prolog (graded 17 out of 20)
- Designed and developed a C++, OpenGL labyrinth game with ASP.NET web service integration (graded 18 out of 20)

Skills

Methodologies & Practices

- Agile
- Test-Driven Development
- Domain-Driven Design
- Object-Oriented Programming
- Continuous Integration
- Automated Testing

Languages & Frameworks

- Java 11
- SQL / NoSQL
- Spring Framework
- Spring Boot
- Junit
- Mockito

Core skills

- Adaptive learner
- Team leader
- Autonomous
- Great Eye for Detail
- Self-Organized

Additional Information

- Professional working proficiency in English
- Native Portuguese proficiency
- Car driving license (category B)
